Features

- The UL listed seal-proof power whip features insulated conductors in a non-metallic conduit with zinc alloy or PVC connectors, ensuring reliable AC to power source connections.
- It includes one straight connector and one 90-degree connector, both removable for flexible installation.
- It resists corrosion, oil, water, and sunlight for long-lasting durability.
- Offers three distinct wire colors for easy hook-up and comes pre-assembled with all UL-certified components.
- Easy to use, reduces installation time and costs.

Note: Be sure to purchase the correct size conduit for your electrical box.
